## Profile

Driven software developer with a year-long placement experience as a software developer. Proficient in multiple programming languages and adept at translating theoretical knowledge into practical solutions. Skilled in problem-solving, database management, and backend development. Experienced in Agile methodologies, fostering collaboration and adaptability. Eager to contribute technical expertise and innovation to dynamic projects, maintaining a keen eye on industry trends. Committed to continuous learning and growth, with a passion for creating robust and user-centric software applications. Ready to bring dedication, adaptability, and a solid foundation in computer science to contribute to impactful software development initiatives.

## Experience

### EnAppSys – 2022-2023

Engaged in a transformative year-long placement, where I applied theoretical knowledge to real-world scenarios. Contributed to software development projects from concept to completion. Developed proficiency in Java, database management, and web technologies such as JavaScript and React, enhancing problem-solving skills along the way. Gained expertise into AWS, embracing adaptive development processes and effective communication. This experience cultivated a deep understanding of industry practices, bolstered teamwork abilities, and provoked a passion for creating innovative solutions. Through this placement, I have laid a strong foundation for my career, ready to contribute positively to future projects.
